Course Authoring Tools

You'll have the right tool for the job, always

Articulate 360 includes every Articulate authoring tool, updated continuously with new features.

Create interactive, multi-device e-learning with award-winning Storyline 360. Develop a responsive course in minutes with groundbreaking Rise. Transform PowerPoints into e-learning with Studio 360. And record training videos on your iPad, Mac or Windows PC with Preso, Peek and Replay 360.

With Articulate 360, you'll always have the perfect authoring tool for every e-learning project.

Storyline 360

Any course you can imagine, on any device imaginable

Let technology do the heavy lifting to deliver richly interactive e-learning to any device.

Responsive player

The new responsive player dynamically adapts to tablet and smartphone screens, providing an optimal view of your Storyline 360 course on every device. You can even preview how it'll look on smartphones and tablets before you publish. Your course automatically plays beautifully on all devices, without requiring you to tweak your content to fit different breakpoints.

Optimised playback

Designed to deliver an ideal learner experience on any device, the responsive player hides sidebar menus, eliminates browser chrome and delivers mobile-friendly playback controls and touchscreen gesture support on any screen size and orientation.

“Storyline 360 is everything I love about Storyline and more. Simple enough for new designers to get their courses designed and produced quickly. Robust enough for power users to design anything they can imagine. And with the responsive player, courses play beautifully on every device.”

Tracy Parish

Storyline 360

Interactivity without limits

Create any interactive e-learning you can imagine with Storyline 360. It's simple enough for beginners, powerful enough for experts.

Easy interactivity

Build custom interactions in minutes with simple triggers, slide layers and states. Drop buttons, dials, sliders, markers or hotspots onto your slide to create engaging interactions in seconds. And use intuitive variables to build personalised, conditional interactivity with minimal effort.

Engaging video

Give learners a visual tour with screencasts, videos and software simulations. Storyline 360 lets you record screencasts with captions, characters and pan-and-zoom effects, build software simulations more easily than ever before and import video in any format.

Flexible assessments

Storyline 360 has everything you need to assess learners any way that you want. Create insightful assessments by using 25 different question types and importing existing questions. Or build graded decision-making activities, such as drag-and-drops, from any objects on your slides.

Articulate 360 integration

Because it's part of Articulate 360, Storyline 360 lets you add templates and characters from Content Library without interrupting your workflow. And when you're ready for stakeholder input, simply upload your course to Articulate 360 to gather consolidated feedback with Articulate Review.

“Just wanted to say I absolutely love what Articulate did with Storyline 360 and Studio 360!! Everything I could have asked for. Three thumbs up!”

Sean Tenney

Lead Training Producer

Rise

Responsive course authoring, done right

Rise automatically adapts courses for every device under the sun—you don't do a thing. It's responsive authoring the way it should be.

Web authoring

Create beautiful, inherently responsive e-learning right in your web browser. There's no software to download and no learning curve. Just a simple, easy-to-use web app. Simply add text and media—Rise does the rest.

Mobile previews

In just one click, preview individual lessons or your entire course before you publish to see how it'll look to learners on desktop, tablet and mobile devices.

Easy distribution

Rise publishes SCORM- and Tin Can API-compliant courses that play seamlessly in your LMS on any desktop, laptop and mobile device your learners choose.

“Rise just raised the bar and set the standard for multi-device e-learning development. Rise is what we've all been waiting for.”

Jeff Kortenbosch

E-Learning Developer

The image features a collage of digital devices showcasing a course interface. At the top left, a tablet displays a title card with an orange background and the text 'Employee Health and Wellness' and '11% COMPLETE'. Below it, another tablet shows a course slide titled '01/12 Emotional Wellness' with a background image of a wooden sauna interior containing rolled white towels and a wooden bucket. To the left, a smartphone displays the same title card and a 'COURSE PLAN' section with a list of topics: 'Wellness Assessment', 'Creating Healthy Meals', '12 Weeks to Success', and 'Career Building'. A small cartoon character of a person in an orange dress is positioned at the bottom left, appearing to interact with the smartphone. On the right side of the page, a large image of a wooden sauna interior with two rolled white towels is shown. Below this image, a text block explains the importance of emotional wellness.

Rise

Effortlessly responsive lessons

Every lesson in Rise is fun to experience and beautiful to behold on any device.

Dazzling interactions

Let learners explore events on an interactive timeline, walk them step-by-step through a linear process, describe key components of a graphic with interactive markers and give them immediate feedback with lean-forward sorting activities.

Custom lessons

Unleash your creativity with the learning blocks in Rise. They're components you stack to design custom lessons that look gorgeous on every device, in every orientation. Choose from dozens of block types, arrange them in any order you want, add content and voilà! You'll have a unique lesson that's perfectly suited for any subject matter.

Visual screencasts

Create screencast lessons to demo software or give a quick how-to. It's simple to create Rise lessons from your Replay and Peek screencasts.

Multiple-choice quizzes

See what your learners know or simply pique their interest. You can easily build multiple-choice assessments in Rise.

“Wow. Elegant. Functional. Sexy. Incredible. Brilliant. Really. This is the way a modern course development tool should work, look and feel.”

Steve Flowers

E-Learning Developer

Preso

Create training videos with your iPad

iPad authoring

Create informal training videos on your iPad with Preso. Choose PDFs or images, then narrate and annotate them with simple swipes, taps and gestures. Walk learners through slide content with audio. And guide them visually with pans and zooms, pen-and-pointer highlights and drawings.

Simple to share

Upload your Preso video to Articulate 360 to collect in-context feedback with Articulate Review, add your video to a Rise course or create a SCORM-compliant package to upload to your LMS.

“WOW! The possibilities seem endless to me. With just my iPad Mini, I can record just about anything, narrate, annotate and share instantly. This is going to be my go-to tool for rapid turnaround.”

New Recording

Peek

Easily record screencasts

Screen recording

No matter what you're working on, Peek is ready to record the action on your Mac or PC. Choose the area you want to capture down to the pixel, and select your mic from a simple drop-down menu. Check out the volume level to see your voice coming through loud and clear, then start recording.

Easy sharing

When you're ready to share your screencast, upload it to Articulate 360 with a single click, share with a unique link or download it for your LMS.

Simple workflow

Peek is always a click away on the Mac menu bar or Windows system tray. It takes just a minute to record, preview, and add a Peek screencast to your Rise lesson- and it doesn't interrupt your workflow.

"I love that Peek is so quick, easy and readily available. It couldn't be simpler to grab Peek, record my screen and share it. It's as light as can be."

Jackie Van Nice

Instructional Designer

Replay 360

Screencasts, plus you

Personalised screencasts

Replay 360 makes it simple to create professional-looking screencasts with a personal touch. Walk learners through content by capturing your on-screen and webcam activity at the same time-or separately.

Simple editing

The intuitive interface in Replay 360 makes it easy to fine-tune your screencasts. Flip between video clips or show two at once with picture-in-picture mix effects. Separate, trim and delete sections to tell the best story. And add text to the lower third of the screen to emphasise important information.

MP4 output

Because Replay 360 publishes in MP4 format, you can use your screencasts anywhere. Add them to your Storyline 360, Rise and Studio 360 projects, or upload them to your LMS.

“Articulate Replay is the easiest, fastest, most intuitive way I know to combine clips, stills and audio into a professional-quality screencast.”

Helene Geiger

E-Learning Developer

The screenshot displays a video editing software interface. At the top, there is a menu bar with 'FILE', 'HOME', and 'HELP' options. Below the menu, a toolbar contains various editing tools: Record Screen, Video, Audio, Image, Lower Third, Cut, Delete, Split, Silence, and Publish. The main workspace shows a browser window with a Trello board titled 'Comstar'. The board has three columns: 'To Do' (with cards like 'Research Bandwidth limitations in NY' and 'Plan Company Retreat'), 'Doing' (with cards like 'Setting Q4 Goals', 'Simmons Report', and 'Meet with Anderson Group'), and 'Done' (with a card 'Initiation Report'). A video preview window in the bottom right corner shows a man speaking. Below the preview, a timeline shows a play button, a stop button, and a time indicator '00:21:32 / 01:04:18'. The timeline is divided into tracks for 'Lower Third', 'Mix', 'A', and 'B'. The 'Lower Third' track shows 'Mike - ...' and 'Notification ...'. The 'Mix' track shows segments labeled 'B', 'A', 'A_B', 'B', and 'B_A'. The 'A' track shows a 'Desktop' source with 'No Audio'. The 'B' track shows a 'Webcam' source with a video preview of the man. A vertical line marks the current time on the timeline.

Studio 360

Quickly transform PowerPoint slides into engaging e-learning

Use a tool you already know to create multi-device presentation based courses quickly and easily

Presenter 360

Create a course in the familiar PowerPoint environment with Presenter 360. Import and record audio, and import and adjust video in any format. Insert Flash movies, web objects and interactive content to add engaging visual elements to your slide-based course.

Quizmaker 360

Test learners with quizzes and decision-making activities. Add decision-making scenarios, drag-and-drop activities, quizzes, surveys and more with Quizmaker 360. And insert them in your Presenter 360 course in seconds.

Engage 360

Create interactive content by filling in a form with Engage 360. You can customise interactions by adjusting their sizes, colour themes and fonts and then add them to a Presenter 360 course with a few clicks.

“The timeline in Presenter 360 is great...also love that Engage 360 can now be 16:9. Everything seems so much more responsive and responds really well.”

Phil Mayor

E-Learning Laboratory

Source Assets with Content Library

Get to "Wow!" faster with Content Library

There's an ever-expanding goldmine of templates and characters you can add to Storyline 360 and Studio 360 courses, without interrupting your workflow.

Illustrated and photographic characters

Make your content relatable by adding more than 100,000 combinations of photographic and illustrated characters, expressions and poses to your courses. Select from a range of industries and professions to show learners how your content applies to them.

Gorgeous slide templates

Choose from hundreds of professionally designed, ready-to-go slide templates with cohesive design and colour themes. Every template is put together by the industry's best e-learning designers, so you have all the elements you need to create an effective course. Plus, they're easily customisable and include educational tips on how to use slide elements most effectively.

"I love Content Library. Great diversity of the photographic characters. The templates are fantastic. It will help us all create much more professional looking courses."

Add a comment...

Carolyn Zhang 1d
I like the idea of the introductory slide show here, but it takes too much time. Could we speed it up?

Anthony Smith 45m
I tried various fade times, but taking it faster felt too frenetic. Anything to add, Chad?

Chad Tafolla 45m
Let's leave the fade times and cut down the on screen time of each image. That may help.

Reply...

Anthony Smith 1d
I think this particular image fits well with the course topic. Let me know what you think!

Carolyn Zhang 45m
I'd like an image that better reflects our geographic audience. This course will be viewed by people in 15 different states.

Simplify Collaboration with Articulate Review

Gather project feedback in one place

Finish projects faster with Articulate Review. In one simple web app, you can gather and share feedback on your Storyline 360, Studio 360, Peek, Preso and Replay 360 content.

Consolidated feedback

Keep everyone on the same page. Use Articulate Review to gather consolidated feedback throughout your project, show stakeholders the latest version and manage resolved comments after making changes.

In-content comments

Reduce confusion and rework with in-context comments. You'll see a screenshot of what reviewers saw when they commented, so you know exactly what changes to make.

Faster resolution

When multiple reviewers chime in on a topic, see all related comments and responses in one place. Stakeholders can create separate comments on a single slide, so you can address and resolve items one at a time.

“I love, love, love Articulate Review. Getting your course or video out there for review used to involve formatting Word documents or creating review documents. Now, it's so easy!”

Articulate 360 Teams

Give your whole team access to Articulate 360, plus so much more

Articulate 360 Teams gives your training organisation account-level management, priority support and access to all the tools and content in Articulate 360.

Simple account management

Articulate 360 Teams lets you manage user, seat and billing information in one place. Add new users to your account and update user permissions in seconds. And easily view unassigned seats, see who already has a seat and transfer seats when your team changes.

Consolidated billing

Simplify budgeting and expense management. You'll get one annual bill that covers all of your Articulate 360 Teams seats.

Health checks

Our success coaches check in regularly with you to make sure your team is happy with Articulate 360.

Priority support

Your team will receive priority email support, so they'll always jump to the front of the support queue. And they get instant access to support specialists via live chat.

Unlimited storage

Articulate 360 Teams includes unlimited storage, so your team can post their biggest courses to Articulate 360 for review whenever they want—even those packed with large HD video, audio and image files.

“Does it come with a mop so I can clean up my mind after seeing all this? #mindblown This is going to obliterate anyone else calling themselves an authoring suite.”
